

# Standards: Guidance Document

Effective Date: 01/04/2025 Review Date: 01/04/2025

Version: 1.0

## Introduction

The following standards are designed to provide a clear framework for evaluating training facilities and ensuring compliance with health, safety, and operational requirements. These standards align with the application form and serve as a guideline for both applicants and assessors. They aim to establish a consistent and transparent process for assessing training organisations, ensuring that they meet the necessary criteria for delivering high-quality training.

The standards address key areas such as facility suitability, health and safety measures, operational practices, and customer service. By adhering to these standards, training providers can demonstrate their commitment to creating a safe, effective, and engaging learning environment for all participants.

Each standard begins with a specific question related to the application form, followed by an explanation of its significance. Additionally, a list of required documentation or evidence is provided to support the information submitted. This structure not only facilitates a thorough review of applications but also helps organisations identify areas for improvement, ultimately enhancing the overall quality of their training delivery.

By implementing these standards, we aim to foster a culture of excellence and accountability in the training industry, ensuring that all candidates receive the highest standard of education and support.
